## The Value Plan

The Value Plan is designed to give the best possible rate at the time the reservation is made. Generally, the earlier the booking the better the rate, and the rate in one location could be lower than that in another. So, if you are flexible, a cheaper alternative can be selected. Value rates are updated each week and will apply to the booking made in that week regardless of season.

Once confirmed, any amendments involving vehicle, location, dates or renter's name could affect the rate.

## How To Calculate Your Daily Rate

Select the dates you wish to travel and work with your travel agent to find out which Value Plan rate is current. We will quote you a rate from 11 to 88.

This rate corresponds to a daily price on the accompanying rate table and is determined by reading the row number first and then the number at the head of the column. For example, Value rate 25 is USD78 per day for your rental.
